

TikTok Shop Security Questionnaire

Answer and evidence mapping for CaughtUp

Owner: CaughtUp owner and operator

Security and privacy contact: support@getcaughtup.io

Effective date: August 10, 2026

Review cycle: At least annually and after material changes

Prepared: August 10, 2026

This sheet maps each questionnaire item to the adopted CaughtUp policy evidence. Historical answers remain owner attestations. Independent certification and DPO status must not be inferred from a service provider.

Security program

1. Published information security policy or program: Yes after the public Security page is deployed. Upload the combined Security and Privacy Program.
2. Network segregation and threat protection: Yes. Upload the Network and Endpoint Security Policy. CaughtUp uses managed service boundaries, Cloudflare edge protection, HTTPS, authenticated application endpoints, owner scoping, private storage, row-level security, and service-only roles.
3. Antivirus on company endpoints: Yes if the verified Windows endpoint is the only company endpoint. Microsoft Defender antivirus and real-time protection were verified enabled on August 10, 2026. Confirm any additional endpoints.
4. Daily security baseline: Yes only after the owner confirms MFA on every administrative account and confirms every company endpoint follows the adopted baseline. Upload the Network and Endpoint Security Policy.
5. Published access-control and least-privilege policy: Yes. Upload the Access Control Policy.
6. Published data-classification and encryption policy: Yes. Upload the Data Classification and Encryption Policy.
7. Published incident-response policy: Yes. Upload the Incident Response and Breach Notification Policy.
8. Vulnerability or threat-management procedure: Yes. Upload the Vulnerability and Threat Management Policy.

Privacy and compliance

9. Reportable personal-data breach in the past three years: Owner attestation. Select No only if no such event occurred.
10. Regulatory, customer, or individual privacy complaint in the past three years: Owner attestation. Select No only if none was received.
11. Countries where data is stored or processed: United States for primary database and storage. Network requests, edge functions, and authorized providers may process data in other countries where they operate.
12. Internal personal-data protection policy: Yes. Upload the Personal Data Protection and Deletion Policy.
13. Assist sellers or TikTok Shop with access, correction, provision, or deletion requests: Yes. Use the privacy request channel support@getcaughtup.io.
14. Regularly updated privacy policy: Yes. Public URL: <https://getcaughtup.io/privacy/>
15. Appointed Data Protection Officer: No. The owner acts as Privacy Lead but is not represented as a formally appointed DPO.
16. Breach-notification process: Yes. Upload the Incident Response and Breach Notification Policy.
17. Delete customer data at the end of the relationship: Yes, subject to limited legal, security, fraud-prevention, dispute, and provider backup-recovery exceptions. Upload the Personal Data Protection and Deletion Policy.
18. Independent industry certification: No. CaughtUp has not independently obtained ISO 27001, ISO 27701, SOC 2 Type 2, ePrivacy, or an equivalent certification.
